

Orbotix Technologies Company Overview

Orbotix is a visionary defense products firm committed to advancing Europe's defense technology with innovative, life-saving solutions. Gregory Letare and Bogdan Ochiana founded Orbotix to enhance operators' safety and efficiency on the battlefield. The company operates on a unique model that proactively identifies challenges directly from the field, privately funds its research and development, and rapidly delivers ready-to-use products. This approach ensures that critical defense solutions are deployed swiftly, providing governments and taxpayers with cost-effective and efficient technologies.

Driven by a steadfast commitment to ethical innovation, Orbotix focuses on creating products that are easy to use, requiring minimal training while adapting to the realities of the battlefield. With a vision of a united and strategically autonomous Europe, Orbotix is dedicated to producing defense systems within the region.

Orbotix is headquartered in Brasov, Romania, with a design and engineering hub in Valencia, Spain, where a new assembly facility is set to enhance production capabilities. Our global team of experts in AI, robotics, software engineering, cybersecurity, aerospace, and military operations is at the forefront of developing the next generation of defense technology. Orbotix's vision is to lead the defense industry by building innovative products that protect and empower those on the front lines, ensuring a safer present and a secure future.
