

# Orbotix Industries Company Overview

Orbotix is a pioneering technology company dedicated to advancing **defense, public safety, and critical infrastructure security** through cutting-edge autonomous systems and AI-powered solutions. Founded by Romanian entrepreneur Bogdan Ochiana, Orbotix emerged in response to the urgent need for **innovative technologies** to address modern security challenges. The Ukraine conflict highlighted the importance of equipping operators with tools that enhance efficiency, adaptability, and survivability—both on the battlefield and in civilian environments.

At Orbotix, we combine a **human-centric approach** with advanced engineering to create versatile, easy-to-use systems. Our flagship solutions include the **ATA System**, designed to empower military forces with autonomous threat detection, and **Vmbra**, an AI-driven platform for **public safety, surveillance, and critical infrastructure protection**. These products seamlessly integrate AI, robotics, and intuitive design to provide **real-time intelligence** and **proactive threat detection**.

With headquarters in **Brasov, Romania**, and R&D Centers in **Spain, Estonia and Ukraine**, Orbotix operates globally, leveraging a diverse team of experts in **AI, robotics, aerospace, and military operations**. Our approach prioritizes collaboration with end users, enabling us to adapt quickly to the evolving demands of defense and security. Every solution is rigorously tested and refined to ensure it meets the realities of its intended environment.

Orbotix is committed to fostering a united and strategically autonomous Europe by delivering **innovative, ethically developed technologies** that address both military and civilian needs. Beyond defense, we focus on **empowering security teams, protecting critical infrastructure**, and addressing modern challenges with AI solutions that comply with strict regulations such as the EU AI Act.

Orbotix is more than a technology provider—it is a catalyst for progress in defense and security. By uniting expertise, innovation, and collaboration, we deliver solutions that safeguard lives, enhance resilience, and empower a safer, more secure world.
